

THE CONSERVATION OF NATURE AND DEEP ECOLOGY

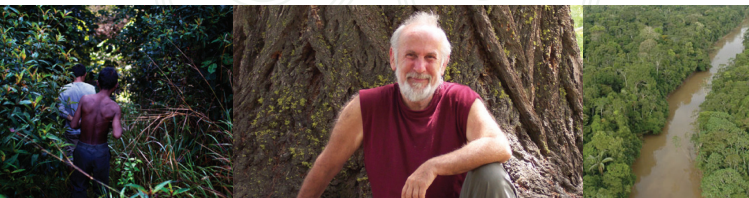

A PRESENTATION BY

John Seed

Thursday April 18th 2013

John Seed is an internationally renowned ecologist who started the Rainforest Information Center and has worked around the world on forest protection. John's presentation will include a 20-minute film "*The Chikukwa Project – from malnutrition to abundance – permaculture tackles hunger in Africa*" followed by a discussion on this project along with deep ecology and the conservation of nature.
